

Form #ATP02 (Rev. January 23, 2019)
Anti-Theft Precautions Endorsement – Tracking System Requirement

It is hereby agreed and understood the policy is amended as follows:

With respect to coverage under Section A and F, for this policy to provide coverage for theft of the insured watercraft or boat trailer, all of the following theft deterrent precautions must be taken by the insured:

An Anti-theft lock nut is required to be installed on all stern drives and outboard motors; and

When disconnected from the towing vehicle, the trailer must be at all times fitted with a coupler locking device specifically designed to prevent the trailer from being attached to another towing vehicle; and

When the trailer is attached to a towing vehicle, the trailer hitch must be fitted with a hitch lock specifically designed to prevent the trailer from being detached from the towing vehicle; and

A tracking system must be installed and active monitoring maintained and operational during the entire policy period.

All of the conditions above require that the locking mechanisms and tracking system used are specifically designed and marketed for this specific use, and have been installed in the manner described by the manufacturer.

Failure to meet all of the above conditions will render the theft coverage null and void under this policy of insurance.
